- In depth analysis, with rapid data refresh and the ability to easily drill down on your data
- Interactive data visualisations allow you to spot trends, benchmark, model and forecast
- Separate dashboards designed for business areas and procurement professionals
- Customised data sets and dashboards can be added

Get enhanced insights

Optix allows you to improve decision making and drive value and efficiency through enhanced spending insights.

- Save money by aggregating demand and adopting category management
- Plan for your procurement resourcing needs
- Identify contracts that are ending shortly
- Better understand and manage key suppliers
- Quickly answer questions from executives
- Make better purchasing decisions

Ease of use

Optix provides an intuitive and dynamic platform that is simple and easy to use.

- 24/7 cloud access – accessible via the web on any device - with everyone in your organisation having a common window into your spending data
- Quickly answer questions using natural language queries
- Easily create detailed visual reports

PROXIMITY

Optix by Proximity is a leading procurement analytics tool that allows you to quickly gain greater insight into your procurement and contracted spending. Optix allows you to easily leverage data analytics to gain greater insight into your contracted spending.

Interactive data visualisations allow you to spot trends, benchmark, model and forecast. With 24/7 cloud access you can also quickly answer questions using natural language queries and easily create visual reports.

The Optix tool allows you to save money by aggregating demand and adopting category management, plan for your procurement resourcing needs, identify contracts that are ending shortly, better understand and manage key suppliers, quickly answer questions from executives and make better purchasing decisions.

Optix uses public datasets such as AusTender and can be supplemented with your internal data sources including financial management systems.

Data gives you the knowledge to power your momentum. Optix provides the data.
